Allowable Subject Matter

1. Claims 1, 2, and 4-21 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or suggest the following in combination with the remaining limitations of the claims:

A method of calculating a static formation temperature in a reservoir penetrated by a wellbore, the method comprising calculating a formation fluid temperature at the wellbore using a three-dimensional fluid flow model through the reservoir, the calculation based in part on the estimated static formation temperature (see independent claim 1).

A method of calculating a static formation temperature in a reservoir penetrated by a wellbore, the method comprising comparing a calculated formation fluid temperature at the wellbore versus time profile based in part upon the estimates of the static formation temperature in the reservoir and the wellbore fluid temperature, and a measured fluid formation temperature at the wellbore versus time profile for fluid removed from the formation, and predicting the static formation temperature by altering the estimates of the static formation temperature in the reservoir and the wellbore fluid temperature until the error between the profiles is minimized (see independent claim 12).

A method of predicting the static formation temperature in a reservoir penetrated by a wellbore, the method comprising calculating a three-dimensional fluid flow model of the reservoir using an estimated formation fluid withdrawal rate at the wellbore, thereby establishing a formation fluid location versus time profile (see independent claim 17).

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mirellys Jagan whose telephone number is 571-272-2247. The examiner can normally be reached on Monday-Friday from 9AM to 4PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diego Gutierrez can be reached on 571-272-2245. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
